G&G SERIES HOLDINGS LLC

INVESTOR & MARKET VIABILITY BRIEF · Q4 2026

AllinOnesie: The All-In-One Consumer Cybersecurity, Anti-Spyware & AI-Defense Platform

"Secure your devices and finally have peace of mind for you, your family, and your business — AllinOnesie has your back."

Replacing six fragmented utilities and hardware gadgets with a calm, zero-scareware, 1-click protection suite across Windows, macOS, Android, and iOS.

TARGET GROSS
MARGIN

1 The Problem: Fragmentation & Fatigue

Everyday consumers, families, seniors, and travelers face a rapidly escalating wave of modern threats that no single legacy product addresses:

AI voice-clone phone scams

Smart TV ACR frame-grabbing

Airbnb / hotel hidden cameras

Bluetooth gas-pump & ATM skimmers

Roadside ALPR / MAC tracking

ISP / carrier DNS harvesting

Protection today means buying **5-6 separate apps** plus **\$50+ RF bug-detector gadgets** — many of which harvest user data themselves, or break everyday streaming and logins via heavy VPN tunnels.

2 The Solution: One 1-Click Shield

Shared Multi-Platform Core Engine. A single unified ruleset, **privacy-shield-core**, deployed natively on every major consumer OS:

Windows
11/10
.exe

macOS
.dmg

Android
.apk / .aab

iOS
.ipa

Calm, Zero-Scareware UX Advantage. Unlike legacy antivirus "red-screen scareware" that panics users to upsell them, AllinOnesie delivers calm, reassuring 1-click protection on desktop and effortless background protection on mobile.

3 The 4-Pillar Institutional Trust Moat

100% On-Device Processing

Live Call AI audio, camera lens viewfinder, and LAN scans never leave the device. No cloud round-trip, no server-side copies.

Zero Data Broker Resale & Zero AI Training

An architectural inability to log or monetize user telemetry — privacy is enforced by design, not by policy.

100% Non-Breaking Guarantee

Surgical allowlists preserve Netflix/streaming, smart-home controls, printing, first-party logins, and shopping carts.

VPN & Non-VPN Coexistence

Protects anti-VPN users who hate captchas and slowdowns, and runs cleanly alongside existing tunnels for pro-VPN users.

The Convergence Thesis: consumer privacy has split into **digital**, **physical**, **AI-voice**, and **home-IoT** fronts — AllinOnesie is built to own all four from one subscription.

4 Complete Platform Capabilities: 10 Integrated Shields + 6-Area Device Health Suite

Every shield runs on the shared `privacy-shield-core` engine. Categories: **DIGITAL** **PHYSICAL** **AI VOICE** **HOME IoT / DEVICE**

1 Wi-Fi, ISP & Mobile Carrier Blindfold **DIGITAL**
Encrypted DNS (DoH/ECH) stopping Comcast, Spectrum, AT&T, Verizon, and T-Mobile from logging or selling browsing histories.

2 Non-VPN Public Wi-Fi MITM Armor **DIGITAL**
Real-time ARP-spoofing, rogue-gateway, evil-twin, and SSL-downgrade detection at airports, hotels, and coffee shops.

3 Smart Ad & Tracking-Cookie Shield **DIGITAL**
Strips third-party ad networks and `utm` / `fbclid` / `gclid` link trackers while preserving 100% of logins and shopping carts.

4 AI Anti-Scrape & Training Blocker **DIGITAL**
Blocks unauthorized AI crawlers, cloud-recall harvesting, and behavioral profiling.

5 All-Brand Smart TV & Home IoT Spyware Shield **HOME IoT**
1-click UPnP/SSDP, mDNS, and MAC OUI discovery across all **9 major Smart TV ecosystems** (Samsung Tizen, LG webOS, Sony Bravia, Roku, TCL/Hisense, Vizio SmartCast, Amazon Fire TV, Google TV/Chromecast, Apple TV/Philips) + 1-click router ACR telemetry quarantine preserving 100% of streaming apps and firmware updates.

6 4-in-1 Hidden Camera & Bug Detector **PHYSICAL**
Replaces standalone hardware bug detectors: (a) Wi-Fi camera/mic vendor scan, (b) Hot/Warm/Cold BLE signal radar, (c) optical IR/pinhole lens-reflection viewfinder, and (d) phone magnetometer EMF sensor sweep.

7 Gas Pump & ATM Bluetooth Skimmer Radar **PHYSICAL**
Detects hidden `HC-05` / `HC-06` / `RNBT` serial Bluetooth card skimmers before a card is inserted.

8 3-Part Flock & Roadside Surveillance Shield **PHYSICAL**
Passive pocket Wi-Fi/BLE MAC stealth, driving-telemetry broker blocking (LexisNexis, Verisk, Arity), and DeFlock/ALPR camera radar & audio alerts.

9 1-Tap Live Call AI-Voice Clone & Scam Detector **AI VOICE**
Real-time local acoustic & phrase analysis flagging synthetic deepfake voices, grandparent/IRS/bank impersonation, and wire/gift-card coercion — paired with an offline **Family Safe-Word** & calm heads-up guidance.

10 6-Area Device Health & Optimization Engine **DEVICE**
1-click audit & undoable cleanup across Security, Updates, Performance, Devices & Stability, Browsers, and OS Privacy, plus NIST 800-88 Secure File Shredder and Quarantine Recovery.

5 Competitive Matrix: The Only Unified Cross-Platform Solution

6 The High-Net-Worth Boomer Wedge & 3-Generation Household Viral Loop

PRIMARY GO-TO-MARKET WEDGE · 50%+ OF U.S. HOUSEHOLD WEALTH

Protecting Retirees & Boomers With the Most to Lose

Everyday consumers—especially seniors—rarely realize living-room Smart TVs capture screen snapshots (ACR), data brokers sell net-worth profiles, and AI cloners need just 3 seconds of a grandchild’s voice to stage an emergency call. Calm, zero-jargon 1-click defense captures this high-value demographic.

ORGANIC ACQUISITION FLYWHEEL · “GRANDPARENT → PARENT → GRANDKIDS”

3-Generation Viral Loop via Shared Family Safe-Word

When grandparents adopt AllinOnesie and set a shared **Family Safe-Word** against AI voice-clone scams, adult children and grandchildren naturally join the same 5-device Family/Household plan across Windows, Mac, iPhone, iPad, and Android—turning one subscriber into a 3-generation household moat.

Retirees, Grandparents & Families

1-click AI voice-clone scam defense, Family Safe-Word & nest-egg protection.

Travelers & Airbnb Guests

Hidden cameras, hotel Wi-Fi MITM attacks, and gas pump skimmers.

AI-Skeptical & Privacy-First Consumers

Stopping AI scraping/training, Smart TV ACR spying, and data brokers.

Drivers & Anti-Surveillance Advocates

Passive protection against roadside ALPR/Flock tracking and telemetry brokers.

Remote Workers & Small Businesses

Public Wi-Fi armor without VPN captchas or banking lockouts.

Multi-Generational Households

Calm, zero-scareware 1-click protection across PC, Mac, Android & iPhone.

7 Multi-Device SaaS Packaging & Conversion Funnel

TIER 1 · ACQUISITION

7-Day Free Trial

\$0

Friction-free onboarding with a live home Wi-Fi Smart TV scan and PC/phone health check — a high “aha!” moment in the first 10 seconds drives trial-to-paid conversion.

TIER 2 · ENTRY

AllinOnesie Core

\$4.99/mo or \$39/yr

Single-device Health Check, Cleaner, ISP/Carrier Blindfold, Smart Ad/Cookie Shield & AI Anti-Scrape.

FLAGSHIP ARPU DRIVER

TIER 3 · PRO / ULTIMATE MULTI-DEVICE

AllinOnesie Pro

\$9.99/mo or \$79/yr

Up to 5 devices across Windows, Mac, Android & iPhone, unlocking all 10 Shields: Smart TV ACR Shield, 4-in-1 Hidden Camera/Bug Detector, Skimmer Radar, Flock Roadside Shield, and Live Call AI Voice Scam Guard.

Install
1-click setup

10-Second Scan
Smart TV + health “aha!”

7-Day Trial
full shield preview

\$39 / yr

Pro Multi-Device
\$79 / yr · 5 devices

Why Gross Margins Exceed 90%

Because 100% of scanning, acoustic AI scam detection, and rule evaluation run **locally on the user’s device**, AllinOnesie requires **zero expensive cloud GPU inference or VPN relay bandwidth** — yielding software-best **90%+ gross margins** at scale.

AllinOnesie (on-device)		90%+
Cloud-AI security apps		Lower
VPN relay services		Lower
Hardware detector gadgets		Lowest

Illustrative relative gross-margin profile by delivery model; not audited financials.

8 Corporate & Legal Architecture

Wholly owned by **G&G Series Holdings LLC** (Florida LLC), with institutional-grade consumer legal protections built into every install via clickwrap acceptance:

Clickwrap Terms of Service

EULA

Supplemental Detection Disclaimers

Call-Monitoring Consent Notices

Strict Liability Cap

Binding Individual Arbitration

Class-Action Waiver

Risk mitigation: on-device design minimizes data-breach exposure; consent flows address call-recording laws; detection disclaimers set clear expectations for physical-sweep tools.

9 Investment Highlights

6 → 1

Consolidates six paid tools & gadgets into one subscription

4 OS

Single shared core engine across Windows, macOS, Android & iOS

90%+

Target gross margin from zero cloud GPU & zero VPN relay cost

5 devices

Pro multi-device plan drives household-level ARPU & retention

AllinOnesie — one subscription. Every device. Every front of modern privacy.

Digital + Physical + AI Voice + Home IoT protection, built on a zero-telemetry, high-margin on-device architecture.
